

About HOEC

HOEC was the first private company in India to enter into the field of Oil and Gas Exploration. HOEC's operational activities commenced in 1991 with the Government of India announcing the fourth round of exploration bidding for private sector participation.

Projects in India

The Company has a portfolio of onshore and offshore blocks are undertaking drilling and development activity(s) within India which are at different project cycle. The Offshore and Onshore blocks are as follows:

1. Cauvery (Tamilnadu)

a. PY-1 Block

HOEC is developing the offshore PY-1 Gas field located in the Cauvery Basin in the state of Tamilnadu. PY-1 development project consists of an offshore platform, offshore and onshore pipeline and an onshore terminal to be located at Pillaiperumalnallur.

2. Cambay (Gujarat)

a. CB-ON-7 (near Palej)

This block is located on the eastern flank of the Bharuch depression in south Gujarat. Exploration Phase is over and currently two oilfields have been discovered. The block was awarded in a pre-NELP 6th round.

b. Asjol,

This block, located in Mehsana area, was awarded under 1st round of small size field development. 3 wells are on production since 1995. The company is planning to drill 4 development wells to augment production.

c. North Balol

This gas field is also located in Mehsana area, and was awarded under the 2nd round of small size field development. The field was put on production in November 2005 and currently 3 wells are on production. Additional development has also been planned for implementation as the field production and gas off-take progresses.

3. Arakan (Assam)

AAP-ON-94/1 covers the area between the Naga thrust and the Singyang thrust. It appears to contain at least two major hydrocarbon trends, the Assam Shelf trend and the Foothills trend. The consortium has announced this discovery and has plans for further exploration and appraisal.
